

HANDLE & HINGES

FOR ALUMINUM PROFILE

DOOR HANDLE

The handles can be used in a wide variety of applications, from products with minimal panel protrusion, to handles for shafts and other mobile industrial equipment, semiconductor equipment, information and communication equipment, to cam locks for high vibration doors or doors requiring a strong seal.

Part Number	L	P	W	H1	H2	M	Material	For Aluminum Profile
ES-HDG-S79 (30)	94	79	15	19	4.2	4.5	Zinc Alloy	30x30, 40x40, 40x80
ES-HDG-S113.5	133.5	113.5	20	27	5.2	4.5		

HINGE D60 SERIES

Material	ZINC ALLOY
Surface Processing	DC (Matte), CR (Glossy), BK (Black)
Application	Used in various industrial devices, environmental test devices, etc.

Part Number	L	L1	L2	P1	P2	M	For Aluminum Profile
ES-HGD60X60	60	30	30	15	15	4.5	30x30, 40x40, 40x80
ES-HGD60X70	70	35	35	20	20	4.5	

HINGE 002 SERIES

Material	SUS304
Surface Processing	Hairline
Application	Stainless steel for durability and corrosion resistance

Part Number	L	W	P1	P2	P3	T	D1	D2	N-ØD	For Aluminum Profile
ES-HCH-002-75	75	50	30	27	27	2	4.5	8.5	6-5.3 HOLE	30x30, 40x40, 40x80

NYLON DOOR HINGE

Part Number	ES-HCH-048
Material	NYLON(PA)
Surface Processing	Black
Application	Functions to lock the door at any angle using the lever.

DOOR MAGNET

Part Number	ES-HBC-50
Material	ZINC ALLOY / STAINLESS STEEL / BRASS
Surface Processing	Chrome plating / Polishing
Application	Furniture, switchboards, etc. / Distribution panels, controls, etc.
